P6MyCarePlan | Fact Sheet

An App built to support Resident & Client dignity & choice

Using the P6MyCarePlan App, the resident/client or their family/representative, can view or enter details they want to, add pictures or documents they want to, view pictures added by staff onto their profile, view any Events or Tasks associated with them, receive newsletters and alerts – all from a tablet or phone of their choice.

Organisations can EDIT the fields that appear in the App or ADD other fields to appear in the App from their own Platinum6 program. Staff can set or view all details – photos, Events, Documents, forms - on their computer or tablet. Those with permissions to access the client's App can view the auto Summary Care Plan and can either Read, or Write if permitted, details for any of the 30 mini 'P6MyCarePlan' forms.

Leecare's P6MyCarePlan supports residents/clients and families/representatives have an easy to use communication forum, with staff and management through simple to use, advanced 'App technology'.

Easy to support, easy to communicate through technological innovations, the Care Sector now has a service like no other!

- + Any permissioned person can access the P6MyCarePlan App from a tablet or their phone, from anywhere
- + Security is maintained through a set Username & Password and a Setting that must be issued by the organisation to link to the resident/client's Platinum6 details
- + Staff at the Service can open the client's home page on their computer, add details for the permissioned person to access
- + The resident/client can then discuss and liaise with their family/representative or staff based on what is viewed on the App, and discuss, reminisce, assess and plan needs

When residents/clients enter details into their mini 'P6MyCarePlan', the details feed into the Platinum6 program and the resident/client's care plan.

- + Tasks/Events displayed in the App come from those linked to the resident's profile
- + Photos and documents loaded into Platinum6 by staff can be made available to the App with the touch of a button
- + Residents/clients or families/representatives can then view photos or ask to have a document copy as named in the App e.g. pathology results, specialist reports, hospital discharge
- + Residents/clients can take photos from their phone or tablet for staff to view in the home page
- + Organisations determine which fields are Read or Write and which feed to the care plan when they use Platinum6

Clients can complete the following 'mini forms' by either speaking into the App or typing preferences and goals of life, which all link to the person's Summary Care Plan:

- Summary Care Plan
- MyCarePlan Review - Feedback
- My A day in the life of
- My Advanced Health Directives
